**Conference Description:** This conference focuses on trends and issues in practice facing the nursing professional and provides a comprehensive examination of nursing informatics theories, impact of human factors, systems analysis, and design approaches. Methods for managing both information databases and systems, as well as the evaluation of computer technology systems are included. The content provides an opportunity to prepare for the ANCC Nursing Informatics Certification Exam and is conducted by certified informatics nurses.

**Conference Objectives:** At the completion of the conference, participants will be able to:

1. Examine theories, models, and frameworks that could be used in healthcare and nursing informatics practice, education, administration, and research domains.
2. Distinguish among the terms human factors, ergonomics, human-computer interaction and usability.
3. Discuss system planning concepts.
4. Describe available hardware, software, and communications components for a healthcare information management solution.
5. Identify strategies to establish a solution.
6. Develop an implementation plan and project management plan for an information systems plan.
7. Evaluate the implementation of a healthcare IS solution.
8. Identify opportunities to contribute to local, state, national, and international informatics initiatives.
9. Assess readiness to complete the ANCC certification examination for nursing informatics.

**Continuing Education Credit:** This course has been approved for 20.4 contact hours by the Maryland Nurses Association, an accredited approver of nursing continuing education by the American Nurses Credentialing Center's Commission on Accreditation.

**Information:** For additional information related to program content, contact Dr. Karen Kelly at 618-650-3908 (email: [kkelly@siue.edu](mailto:kkelly@siue.edu)).
