Who Should Attend: Conference designed for both novice and experienced informatics nurses interfacing with information systems departments, managers of nursing information systems, informatics educators, and others interested in being involved with health care information systems. As the use of computers in health care becomes increasingly critical, it is essential to provide nurses with skills and knowledge in information management.

Conference Objectives: At the completion of the conference, participants will be able to:

1. Examine theories, models, and frameworks that could be used in healthcare and nursing informatics practice.
2. Distinguish among the terms human factors, ergonomics, human-computer interaction and usability.
3. Discuss system planning concepts.
4. Describe available hardware, software, and communications components for a healthcare information management solution.
5. Identify strategies to establish a solution.
6. Develop an implementation plan and project management plan for an information systems plan.
7. Evaluate the implementation of a healthcare IS solution.
8. Assess readiness to complete the ANCC certification examination for nursing informatics.

Nursing Contact Hours will be awarded.:

This offering has been approved for 20.4 contact hours by the Maryland Nurses Association which is accredited as an approver of continuing education in nursing by the American Nurses' Credentialing Center's Commission on Accreditation.
